the trial for murder of Dr. Henry C. F. Meyer, before Justice Barrett, in the Court of Oyer and Terminer.

It is a story, not simply of murder, but of a dozen deliberately planned and diabolically achieved murders by the slow set and most insidious processes of poisoning. The witnesses upon whom Mr. McIntyre depends for this story are the confessed accomplices of the arch-murderer—August Wimmers, alias Carl Muller, and his pretty wife, Mary Neiss, who was saved from death by poisoning at the hands of the bloodless Meyer only through the accident of having excited the love passion is note of her intended murderers, now her husband.

Muller speaks with a very strong accent and is hard to follow. He said that in 1890 he was arrested for using the inited States mails for illegal purposes. "What conversation did you have with Dr. Mcyer?" again asked Mr. McIntyre. "He asked me what I was in jail for. I told him. He said there was not enough money in that. He said he would put me on a scheme by which I could make thousands," said Muller. "He said the scheme I was in was no good; that we could swindle life insurance companies out of thousands. more objectionable on this account than that of Sig. Acconcio, who is now going to take charge of Uncle Sam's mail for the district.

The secret of the kick against the change is the fact that the management of the sub-station is a nice little plum for the favored individual, as the compensation is \$400 a year.

La Maida has had the job for two years, and now the friends of Acconcio, who has long cast envious eyes at his meighbor and rival in the banking and saloon business, think he ought to have a show. Acconcio applied to the Department at Washington for the removal, in lent place for the sub-post-office than the one in the middle of the block.

The change was ordered before La Maida's friends knew the application had been made. Since then they have been talking a good deal, and saying lots of mean things about Acconcio and his crowd.

BANK TAX REPEAL CONDITIONAL

Comptroller to Direct the Issues of the State Institutions.

WASHINGTON, Dec. 8.-The bill to repeal the 10 per cent. tax on State bank circulation, as framed by the kub-committee on Banking and Currency, will be reported to the full committee for final action before report to the House. It does not repeal the tax unconditionally, but provides that the issues of tionally, but provides that the issues of currency shall be under the direction of the Comptroller of the Currency and shall be limited in amount. The Comptroller's supervision will prevent the issue of currency which is not amply secured and tend to prevent wild-cat issues.

It is understood that the bill has the approval of the President, who desires the repeal if it is surrounded with proper safeguards.

The Committee base their bill on the proposition that the regulation of State bank circulation by the National Government would be permissable under the interstate commerce clause of the Constitution on the ground that currency is one of the means of commerce between the States, and that it is the duty of the United States to regulate the medium of commerce, no matter by what authority issued.
